Label Printing Terminology

Adhesive

- Back - Adhesive is on the back of the label. If this label is being applied to a window, it will go on the outside of the window.
- Face – Adhesive is on the front of the label. If this label is being applied to a window, it will go on the inside of the window.

Backside Printing

Copy is printed on the liner of the label. This printing method is used to offer coupons or convey additional information.

Bleed

Ink extends to the edge of the label.

BOPP Stock

Biaxially-Oriented Polypropylene.

Cores

The inner diameter of a roll of labels. The standard finishing is coreless. 1" and 3" cardboard cores are available upon request. For additional sizes, see sales associate.

Emboss

An image is pressed into the material to raise it above the normal level of the material.

Extended Life Durable Decals

Labels are manufactured to withstand harsh environments and rugged applications. Durable for up to 4 years.

Lamination

Clear plastic coating that provides extra durability.

- Matte – Can be written on
- Textured – Used to add texture to labels
- Shiny – Shiny coating

Machine Applied

These labels are set up to meet the requirements of the machine that will be applying them. The core size, rewind direction and maximum roll size will often need to be confirmed.

Opaque

A darkened adhesive used as a "cover up". Restricts copy from showing through the face stock.

Perforation

Liner is perforated between the labels allowing them to be easily separated.

Pli-a-Print Stock

This material is good for application to plastic bags or uneven surfaces.

Pressure Sensitive Label

A self-adhesive label that is easily applied to a surface by pressure.

Process Color Printing

Also known as Four Color or Full Color Printing. The use of four ink colors (Cyan, Magenta, Yellow and Black) to create an image, such as a photograph.

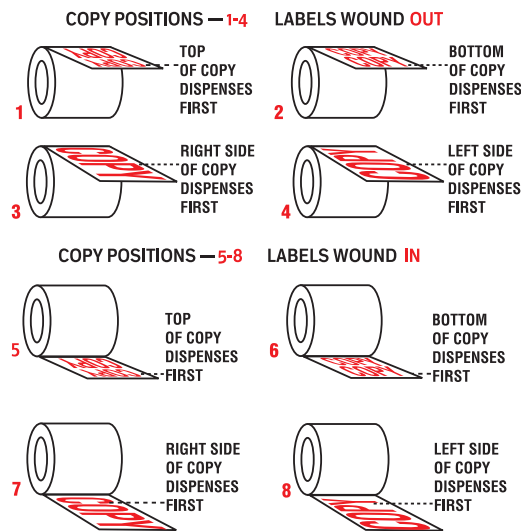

Repositionable Labels

Patterned adhesive that allows the label to be applied and reapplied to almost any surface. Removes cleanly leaving no residue.

Reverse

Image is created by the label stock color showing through the ink coverage.

Rewind direction

Single

Labels are individually cut and stacked.

Spot Color Printing

The use of one ink for each color printed. Separate plates are required for each ink color being applied to a material.

Static Cling

Labels have no adhesive and adhere to glass or other smooth surfaces with static electricity.

Square Cut

Also known as Butt Cut or Kiss Cut. These labels are cut exactly to size with no excess liner around the label. Order any size from 1/4" x 1/4" to 12" x 38".

Tint

The entire surface of the label stock is covered with ink. Also known as flood coat.

Varnishes

Liquid coatings that are printed onto the label surface.

- UV – UV-cured varnish, very high gloss
- Water based – Protects label from slight moisture, less durable than UV varnish
- Matte – Dull varnish, can be written on
- Spot – Only part of the label is varnished

Weatherproof Labels

These labels can withstand heat, cold, water and sunlight for up to 1-1/2 years.

Popular Type Styles

All type styles are available in any size. We carry the entire Adobe® and Corel font libraries. For additional information please see sales associate.
